

8 April 1952

MEMORANDUM FOR THE FILE

Subject: Office of Scientific Intelligence (OSI)

I had a nice talk today with [REDACTED] who has taken over from [REDACTED] the job of producing the history of OSI. [REDACTED] has been on the job there for a long time and knows his way about the office, and will I think try to get something going. The project has been pushed around in OSI for nearly three months. [REDACTED] will try to have an outline draft ready in a week. I told him if possible we would like to have the completed story by the end of this month.

[REDACTED] 25X1A

F.V. 30 April

19 May, 1952 Report received in duplicate marked Top Secret. It has, therefore, been placed in [REDACTED] file which is accessible only to him. [REDACTED] is following up the charts and statistics which should be received in about 10 days. I also made certain comments to [REDACTED] about the report which we will discuss. In general, however, the report seems to me admirably prepared.
